Oral health in our pets

Maintaining good oral health for your pets improves their wellbeing and reduces the risk of the diseases associated with poor oral hygiene. Dental plaque can accumulate on our pets' teeth, leading to problems like painful eating, gingivitis, periodontal disease, and potential tooth loss.

Preventative measures to help prevent dental diseases include:

- Having a regular routine of dental hygiene,
- Daily teethbrushing with pet-safe toothpaste,
- Monitoring for signs of dental issues (including bad breath),
- Using appropriate chew toys or dental treats,
- Feeding a dental diet,
- Regular dental checkups & tooth cleaning.

May Photo Competition

Go to our @VetSouthPets Facebook page for more information - we'd love to see photos of your pet's happy, toothy grins.

Competition alert:
Show us your pet's smile!

FREE

DENTAL CONSULTS with our Nurses[^]
