

## TREATING LAMENESS

Improve long-term cure rates, reduce production loss and quicken recovery by complementing lameness treatment with the use of non-steroidal anti-inflammatory drugs (NSAIDs) for pain relief. **Talk to your vet for guidance.**

ACVM Act 1997, No. A011384

# DOGS WITH ALLERGIES

All dogs itch sometimes, but if your dog seems to scratch excessively, it could indicate a medical condition that needs attention.

Your vet will be able to determine if the itch is due to an infection, parasites, or skin allergies.

Common signs of skin allergies in dogs include:

- Frequent scratching, licking, biting, or chewing
- Excessive rolling, rubbing, or scooting
- Recurrent ear problems: head shaking, ear discharge, or scratching at the ears
- Hair loss or body odour
- Skin changes: rash, redness, greasy skin, or scabs.

If your dog's itching persists, or if they show any of the above signs, get in touch with us.

## SHAMPOOS FOR SENSITIVE SKIN
